

# AIRSCAPE®

## Airscape® - The Next Level in Food Storage

Most kitchen canisters and containers that are designed to hold food and other perishable goods are what we would consider to be 'airtight'. Although these containers don't let in any extra air, they actually trap air inside the container with your food. This can cause your fresh ingredients to become stale, even though they are in a container that doesn't let any extra air in. Airscape® canisters go one step further: not only are they airtight, but they also remove the majority of the air that usually remains in the container with your food.

With its patented lid design, the Airscape® removes and locks out the air from the container, making sure that your food is the freshest it can be. Using an air valve, the Airscape® lid forces out the air as you push down on the inner lid, releasing the air from the container. You can then close the valve to lock out the air and lock in the freshness. Use Airscape® canisters for all of your pantry ingredients including coffee, tea, flour, sugar, cereal, seeds, nuts, and anything else that you need to keep fresh.

Airscape® technology is available in Classic, Glass, Lite, and Kilo varieties, as well as a Bucket Lid Insert. Sizes range from 200g, 450g, and 1kg.

Add your food, push the Airscape® insert down to release the air, fold down the handle, and place on the outer lid.

## SPECIFICATIONS

- Capacity: Small (200g); Medium (450g); Large (1kg)
- Materials: Plastic, Glass, or
- Inclusions: 1 x Canister; 1 x Airscape® Insert; 1 x Plastic Lid
- Colours: Obsidian (Black), Snowflake (White), Cobalt (Dark Blue), Brushed Silver, Red, Mocha, and Turquoise
