STAR PROGETTI
TECNOLOGIE APPLICATE

HELIOS RADIANT® BLACK

Star Progetti Spa since 1993, international leader in the production and application of the infrared technology, is currently carrying out models of heaters without light emission.

Such heaters, having a high heating power and low consumptions, are going to meet the needs of customers and architects wishing to use this new heater, eco-friendly and effective, without invasive lights that may change the designed setting.

HELIOS RADIANT® BLACK develops an impressive heating power over a wide surface accounting for approx. 15/20 sqm.

HELIOS RADIANT® BLACK Thanks to its design and compact sizes can be easily installed anywhere without problems.

HELIOS RADIANT® BLACK has a robust structure in polyester varnished steel allowing both indoor and outdoor installations, protected against rain and dust (IP23).

The heater is thoroughly designed and produced in Italy

TECHNICAL FEATURES

- Adjustable model for wall installation, equipped with a special heat-resistant safety glass
- For indoor and outdoor areas
- Power 2000 watt
- Protection index: IP23 - Waterproof, protected against rain
