PICCOLINA

"HAND-MADE IN PORTUGAL"

PICCOLINA

DIPACCI

The Futurete Piccolina is an extraordinary machine that has an impeccable system that envisions a compact yet fully commercial functioning patented design. The latest in technology advancements, the Piccolina uses digital technology and has amazing thermal stability. This gorgeous machine is the newest edition to the Futurete brand and over sees quality in its hand-made assembly - crafted in Portugal.

FEATURES

VOLUMETRIC CONTROLS

The Futurete Piccolina acquires programmable volumetric buttons to precisely measure the extraction of water and coffee ratio.

EASY INSTALLATION

The Piccolina is a flexible commercial machine that has the ability to be installed through water mains and flow jet simulator for portability and an easy set up for convenience.

LOW POWER USE

The Piccolina is a great power saver, meeting the requirement for off-grid use at 10Amp power, adopting a more convenient and portable set up for any coffee business.

SMALL BUSINESSES

The Futurete Piccolina is ideal for a smaller business with lower volumes and higher standards. The Piccolina upholds resilience, stability and consistency in coffee creation.

E61 GROUP HEADS

This beautiful stainless steel machine comes with E61 group heads, fitting the standard group portafilter. Single and double spout heads for even extraction.

COST EFFECTIVE

The Piccolina is priced very competitively especially when compared to the latest machines on the market. Piccolina is unique as it is a commercial one group.

SPECIFICATIONS

- Single group head
- Excellent thermal stability
- Persevering the robustness, reliability and resistance, characteristics of a Futurete machine
- Digital or Manual Coffee Dose Control
- Temperature control by pressostat
- Dual scale manometer
